- “gasoline”** means a petroleum distillate, or a mixture of petroleum distillates, oxygenates or additives, that is liquid at atmospheric pressure with a vapour pressure of at least 38 kiloPascals and which is suitable for use in a spark ignition engine, but does not include gasoline for use in
- (a) aircraft,
- (b) competition vehicles, if the gasoline has an antiknock index of 100 or greater, or
- (c) scientific research;
- “parameter”** means a measure of gasoline quality with respect to its vapour pressure or oxygen concentration; , **and**
- (d) by repealing the following definitions:**
- “alternative baseline gasoline”;**
- “aromatics”;**
- “baseline gasoline”;**
- “emissions model”;**
- “olefins”;**
- “service station”;**
